

fiberon[®]

The Fencing Solutions Company

FIB-0081-LIT

Fiberon operates two plants and sells in:

- 50 states
- 18 countries in Europe and Asia

If you were to have the ideal wood fence, it should be:

- Beautiful
- Long lasting
- Able to have no painting required
- Dimensionally stable
- Resistant to termites
- Fast to assemble and install
- Supplied with a 20 year warranty

If you were to have the ideal composite fence it should:

- Have the warmth, feel, and beauty of wood
- Use traditional assembly methods
- Be somewhat flexible in design options like wood
- Be a Green product

Why Fiberon[®] Fencing is *The Fencing Solution*

- Uses proven color streaking technology for unmatched realism and beauty
- Has deep rich double embossing
- Has a good mix of color and design options
- Uses well established assembly methods
- Is a Green Product

Fiberon uses proven Tropics technology so you go from this:

...to this:

**Fiberon fencing features
a deep rich texture**

2 Picket Widths

- 4 ¾" Dogear
- 7" Flat Top
 - Comes square top
 - Custom cut top in field

3 Colors

Costal Cedar

Pacific Redwood

Weathered Pine

Well Established and Strong Assembly Methods

Best of wood and vinyl systems

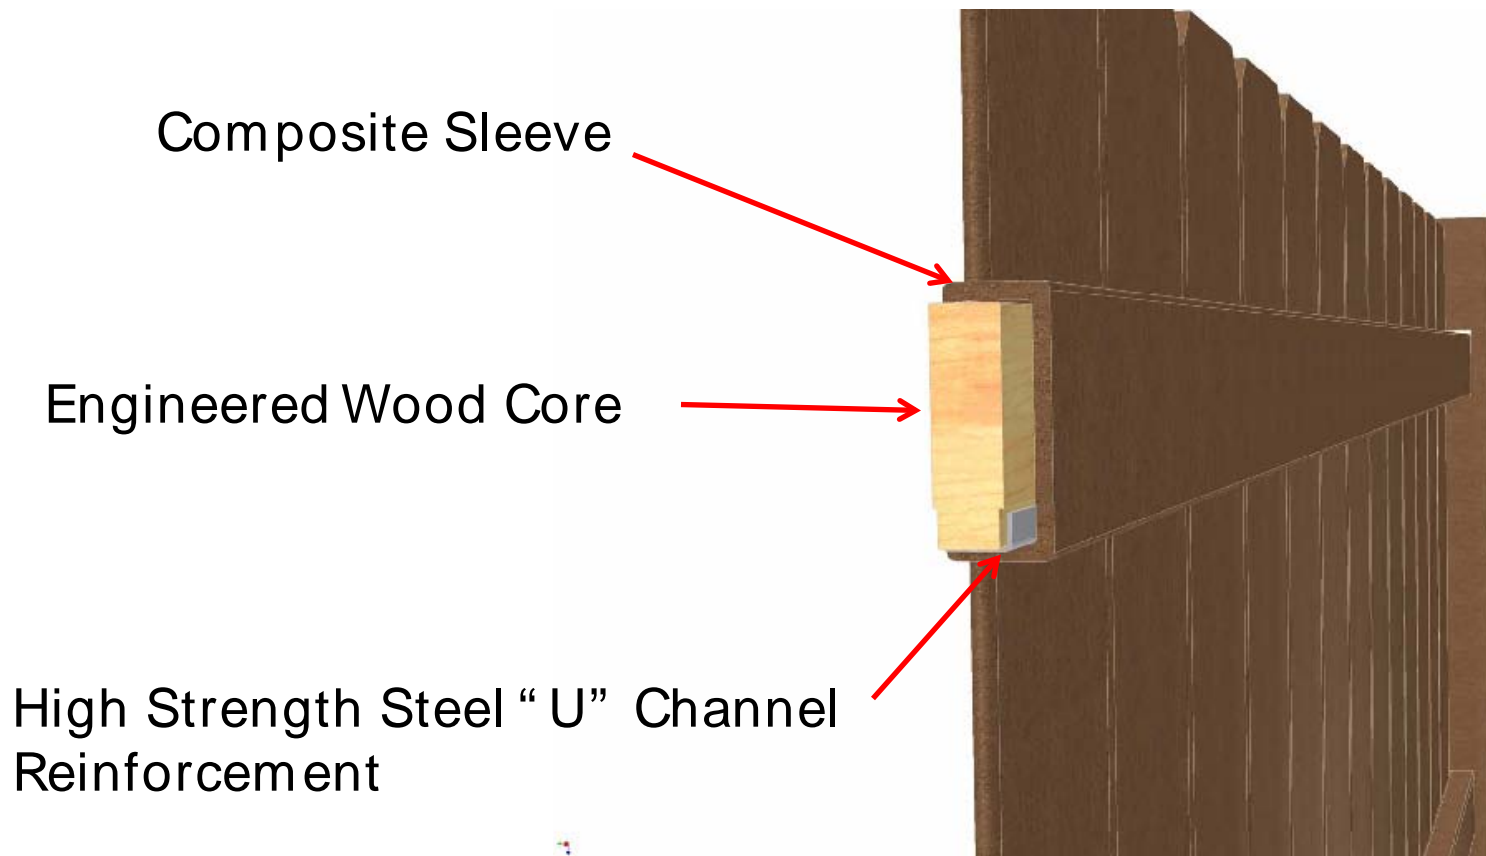

- Solid Pickets install on backer like wood
- Posts are routed to receive rails
- No brackets

Backer Rail Features

- 6' with engineered wood inserts
- 8' with same plus steel “U” channel
- Allows pickets to be
 - Nailed
or
 - Stapled

Triplex Backer Rail for the 8' span

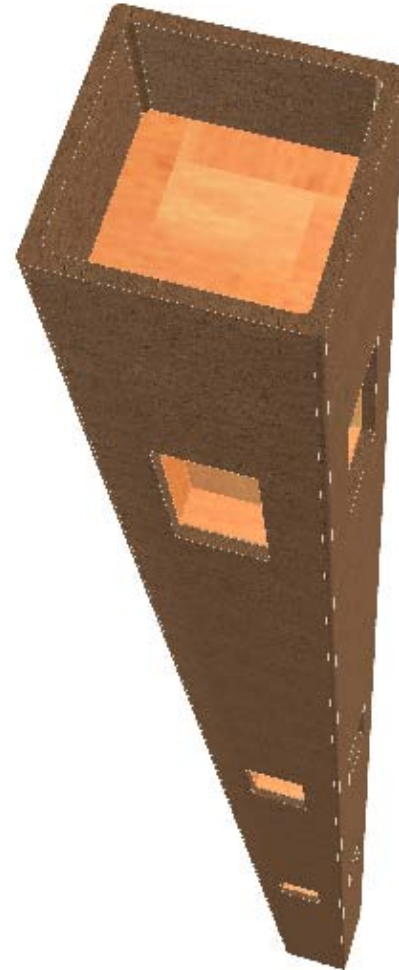

2 Post Options

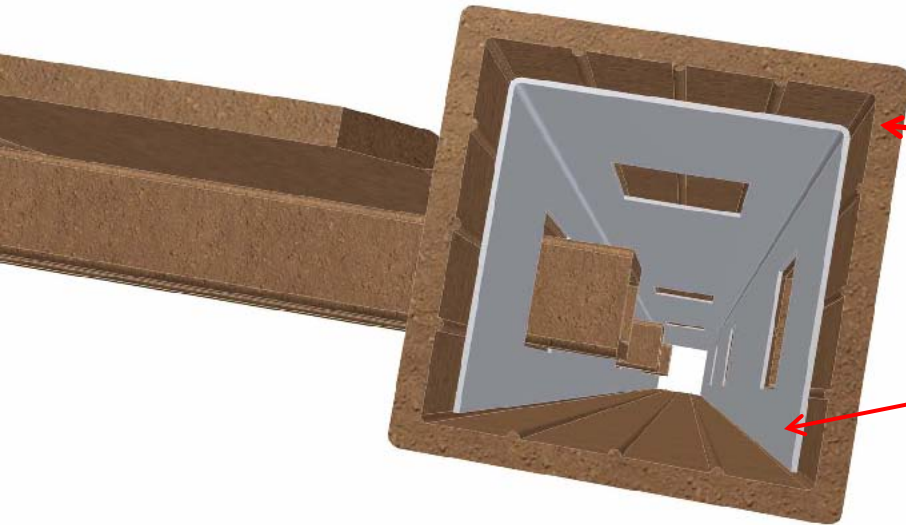

- Routed Post 4x4x9 Steel Reinforced
- Mortised Post 4x4x8 Wood reinforced

Mortised Post

- 4" x4" x96"
- Engineered Wood Core
- Line
- End
- Corner

9' Routed Post

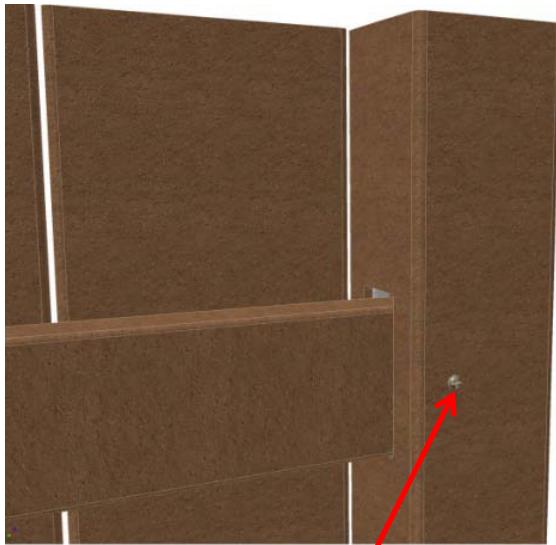

Composite Sleeve pre routed
in 3 standard configurations
End post Shown

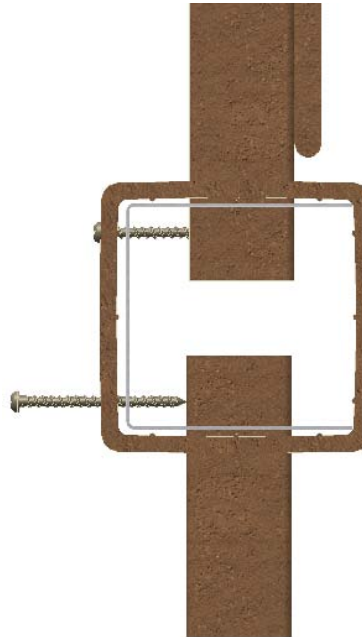

Heavy Gauge Galvanized
steel reinforcement comes
pre-punched for most
popular fencing styles

9' Routed Post Features

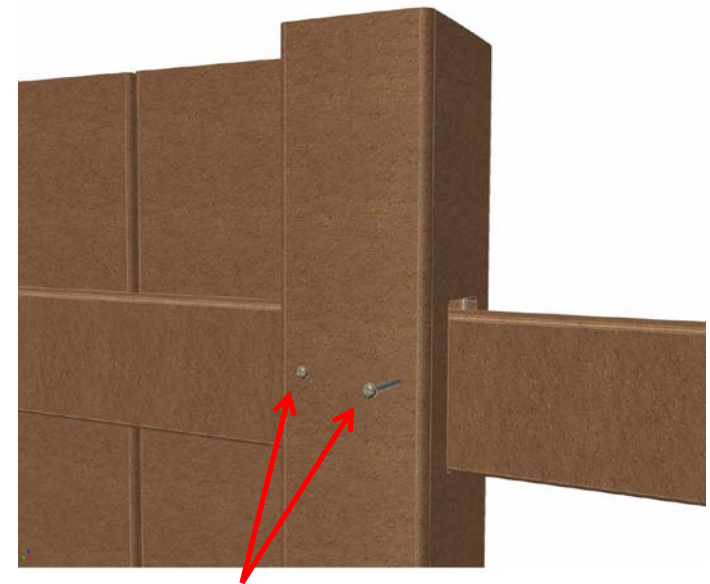

including built-in slope and lateral adjustment

Use SS Self Tapping Screw

Screw secures sleeve, steel insert and backer rail without pilot holes

Line Post uses 2 screws per post

Routed and Mortised Post Options

4 uses

- End
- Line
- Corner
- Gate

Routed Post Steel Reinforcement

Pre punched steel insert allows for

- Standard 3 rail privacy
- Sandwich design
- Custom top insert
- More

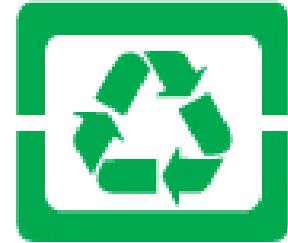

Gate Kit

Green Product

- Fiberon Fence is our most green product to date
- Overall 75%+ recycled materials
 - 50/50 wood to polymer
 - Wood is 100% recycled
 - Of the plastic 25% is recycled split between post consumer and post industrial

Fibron vs. the competition

- Better Chemistry
- Only one to use multi-chromatic technology
- Wood grain texture matches on all components. Others have different or no texture on rails and posts
- No brackets required
- Easy, fast, traditional assembly methods ...more like wood
- Very forgiving installation process
- Design flexibility like wood
- Pre-engineered gate solution plus the ability to “build your own”

Fiberon provides:

- Superior Aesthetics
- Easy assembly
- Design Options and Flexibility
- A Green Product
- Full Marketing support
- Proven performance
