

Fiberon® Horizon™ Decking with PermaTech™ Innovation

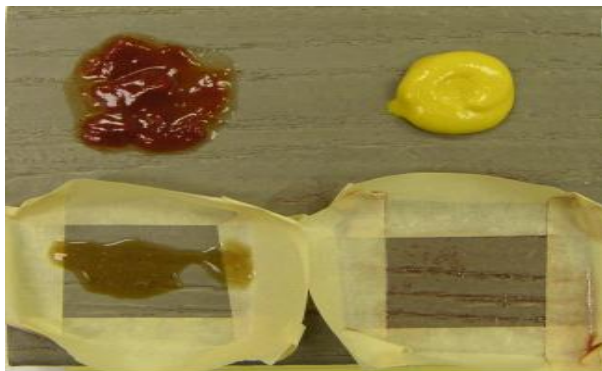

Fiberon® Horizon™ Decking, introduced by Fiberon in the fall of 2008 represents a major breakthrough product introduction for the composite/alternate decking marketplace. Incorporating patent pending PermaTech™ innovation, enabled by a high performance surface material, Horizon decking provides ultimate performance in stain, fade and scratch resistance. During the development of Horizon decking, Fiberon completed a wide array of performance testing to determine the long term performance of the product when subjected to the elements. The results of these tests provide dramatic proof that Fiberon Horizon decking is a highly durable product that can provide superior long term performance for use as an exterior deck board. Fiberon stands behind Horizon decking with a 20 year limited warranty against checking, splintering, delamination, rotting, and structural damage from fungal decay. Horizon is also backed by an additional 10 Year Limited Stain and Fade Resistant Warranty, an exclusive in the composite decking industry.

TECHNICAL BULLETIN #7

Cleaning Horizon Deck Boards

The deck surface should be swept clean and rinsed seasonally, or as needed. Most spills can be blotted up with clean towels:

1. Immediately scoop up as much of the spill as possible.
2. Then blot, do not rub, area with clean white cloths to remove excess moisture.
3. Apply warm, not hot, water to stained area and blot with white cloths.
4. Repeat until no stain is evident on towels.
5. If stain remains on deck, make a solution of 1/4 cup liquid dishwashing detergent to 1 gallon warm water.
6. Using a clean white cloth, apply the solution to the stained area, and let soak about 5 minutes.
7. Rinse with clear warm water and blot to remove excess moisture.
8. If the stain cannot be satisfactorily removed with detergent and warm water, add ¼ cup of bleach to the solution and repeat step 2.
9. Valspar® Goof-Off is a multi-purpose cleaner that is effective on oil based stains.

Fiberon tested ketchup, mustard, soy sauce and Italian dressing stains that were successfully removed with soap and water. Throughout the testing, the Horizon board cleans by far, the easiest and most completely with the least effort.
